

Milan Tree Led

ProCut COB 549 lm LED Strip – Installation Instructions

Product Information

- Voltage: 24V DC
 - Power: 5.18W/ft (2700K–3500K), 4.57W/ft (4000K–6500K)
 - Brightness: 549 lm/ft
 - CRI: 90+
 - Length: 16.4 ft (5 m per roll)
 - Cutting: Free-cut anywhere (no interval, dotless finish)
 - Dimmable: Yes (with compatible driver)
-

Installation Steps

1. **Preparation**
 - Ensure power is turned **off** at the breaker before starting installation.
 - Verify driver compatibility (24V DC, dimmable driver if dimming is required).
 2. **Cutting**
 - Strip may be cut anywhere along its length for custom installation.
 - Use sharp scissors or proper cutting tools to avoid damaging PCB.
 3. **Mounting**
 - Peel adhesive backing and stick strip to a clean, dry surface.
 - For added security, use clips or channels to support long runs.
 4. **Connection**
 - Use compatible 8 mm connectors or solder joints.
 - Match polarity: **+24V to +24V / V– to V–**.
 5. **Testing**
 - Reconnect driver to power and test before final installation.
-

Warnings & Safety

- **Hardwire installation must be performed by a licensed electrician.**
- Risk of electrical shock if installed improperly.
- Do not exceed maximum run length or driver capacity.
- Indoor dry location only (IP20).
- Do not install near flammable materials.
- Ensure adequate ventilation for drivers.
